Hay Guard® is a registered trademark of International Stock Food Corporation

Hay Guard contains a **patented** combination of sulfur compounds that produce gases which:

- limit plant cell respiration in the forage mass
- reduce temperature after baling

The results:

- cooler hay after baling
- greater dry matter recovery
- fresher, more palatable hay at feedout

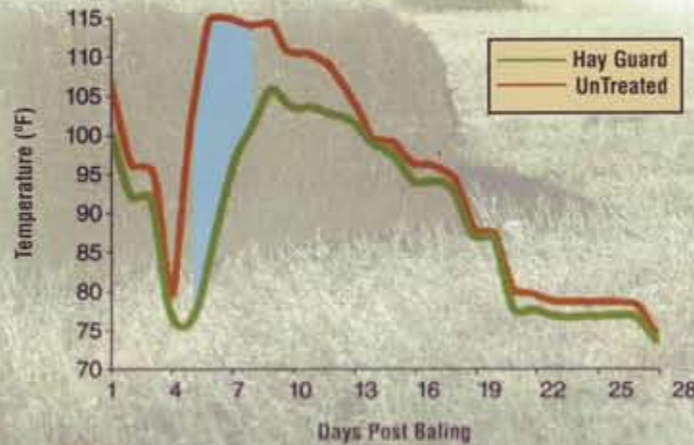

# HAY

Hay Guard® reduced dry matter loss by 50%.

Dry Matter Loss (%)	
Hay Guard®	6
Control	13

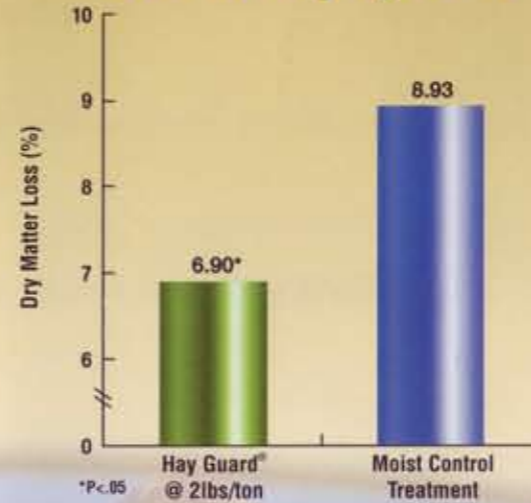

Source: McGill University, Canada

Research Proven. Hay Guard® bales were **22°F COOLER** at days 5-8.

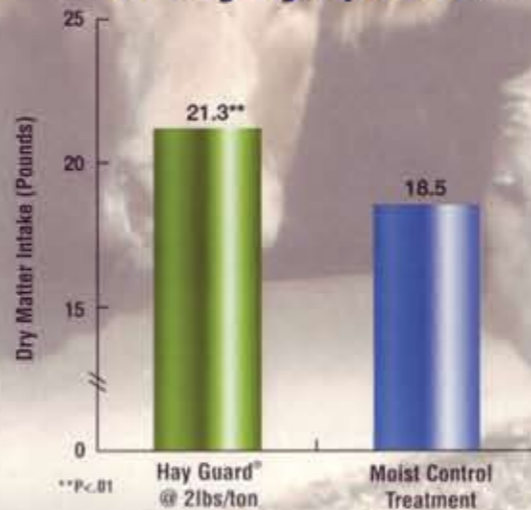

# BEEF

Research documents that Hay Guard® reduced dry matter loss of hay by 25%

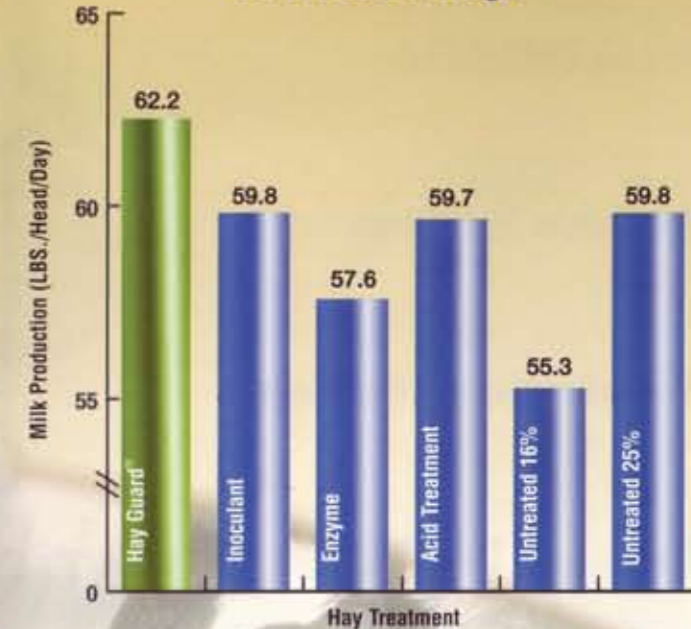

Hay Guard® improved dry matter intake of hay by up to 15%.

Source: Quebec Ministry Agriculture

# DAIRY

Research shows that Hay Guard® cows produced 6.9 lbs. more milk than cows fed dry, untreated hay.
